

Jeff and team,

We wanted to write you a brief note as a small measure of our appreciation for the incredible kitchen renovation you recently completed at our home.

Bo-Bud Construction did our entire kitchen remodel, including a significant structural addition, on time, on budget and to perfection.

When we began this project we were looking for a design build solution and Bo-Bud fit the bill. You worked with us closely from start to finish and provided us with the guidance and hand holding we needed. You and your architects helped us to bring our vision to life. You showed great skill as we worked with structural engineers to move the project forward.

As the project began, it was clear our project manager, Josh, and your design specialist, Jill, were great fits for us. They brought skill, guidance and experience to the project and helped us move forward. Josh was always available, kept the home clean and safe, answered all of our questions, and moved the renovation a successful conclusion. Jill helped us take our vision from paper to reality. She helped with kitchen design, colors, material selection, lighting, and so much more. The entire team, including all of your tradesmen, were always skilled, polite and a pleasure to work with.

Jeff, we love everything about our new kitchen and home renovations. We constantly receive compliments while hearing other people's renovation horror stories. Our experience could not have been more different. From start to finish, Bo-Bud Construction was a true partner and provided us with a beautifully renovated home.

We would be honored to act as a reference for anyone considering your services.

Thanks again, please come over and have a drink in our beautiful new entertaining space!

Craig and Denise Pernick
