RE: Construction of addition at 212 Prince Street, NE,
Leesburg, Virginia

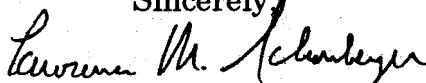

Dear Jeff,

This letter is written to tell you how pleased Martha and I are with the addition to our home. Bo-Bud Construction Company of Virginia did a wonderful job in constructing the addition, particularly in tying the new construction into the existing house. You cannot tell where the existing house ends and the addition begins. Both inside and out it is apparent that the construction is of the highest quality.

It is worth noting that Martha and I were particularly impressed with the way you were able to work with, and adjust for, hidden conditions that appeared when the demolition of the rear of the house commenced and with the way you were able to make the architectural plans work when modifications were required due to those hidden conditions. The end result is what we envisioned.

We have received numerous compliments from friends and neighbors on how beautiful the house looks, particularly the design of the enlarged and remodeled kitchen and the cathedral ceiling in the new master bedroom. Of course Martha and I think the entire project turned out great and would recommend Bo-Bud Construction Company to anyone considering an addition for their home. Thanks again for the wonderful job.

Sincerely,

Lawrence M. Schonberger
